**Subject:** Vipont Mine

I received a call from Bruce Hagans, DERR 536-4174. He was wondering about Utah Regs for explosives. He had some concerns about a storage bunker at the Vipont mine. I told him of the recent Vipont visit by DOGM, SITLA, and the BLM regarding the road trespass. I mentioned that we may be looking at activating this previously inactive mine site due to the recent activities. He recently visited the site with Mr. Thomas Miller. Mr. Miller has bought back the quonset hut located on site, and did mention to Bruce that he was looking at getting the mine going again. Bruce performed water sampling in the area and will send us a copy of his results. He also intends to contact the AML folks about the safety hazards in the area. I told him to contact Mary Ann Wright or Luci Malin for AML stuff, and Lynn Kunzler for any info on our recent inspection.
